

## CARE INFO FOR METROPOLITAN TILES

### CLEANING & MAINTENANCE

***Metropolitan Tiles require significantly less floor maintenance and chemicals than standard commercial vinyl tiles.***

Please use flat plastic, glass or other non-staining cups under surfaces not less than 2" in diameter for legs of heavy appliances and furniture. Use proper floor protectors on all chairs. Remove all small diameter buttons from legs of straight chairs and replace them metal guides no smaller than 1" in diameter. Examine your protectors periodically, check for burrs, debris or wear. Make sure the surface is smooth.

Do not drag any types of furniture and/ or equipment across the floor. These precautions will prevent scratches and indentations from appearing on your floor. Do not expose floor to frequent standing water; wipe up all spills quickly. Watch for tracked in dirt and grit particles. Use walk off mats at all room entrances. Do not use rubber or latex back mats. Certain chemicals in the backing can stain vinyl. Use nonstaining vinyl mats or woven rugs that are colorfast.

No finishes are needed. Do not use any type of floor wax, harsh detergent or solvents like lacquer thinner, abrasive cleaners or "Mop and Shine" type products which can leave a film on the surface. Avoid vinegar as a cleaning agent. Use neutral pH cleaners that are recommended for vinyl.

- **Initial** - Sweep, Dust Mop or Vacuum any debris from installation.
- **Daily** - Sweep, Dust Mop or Vacuum to remove dirt and particulates.
- **Routine** - Auto Scrub with a white pad and a mild neutral pH cleaner.
- **Cleaners** - use premium neutral pH cleaners specifically for vinyl flooring. Sealer and/or Finish - Not required.
